Objective

BS Software Engineering student with practical skills in web and app development. Built projects like a banking system, LMS, chatbot, and Daraz clone website. Skilled in HTML, CSS, JavaScript, Python, Java, C++, and C#. Looking for internship or freelance work to apply and grow my technical skills.

💡 Projects

- **Online Banking System** – Basic banking operations with secure login
- **Learning Management System (LMS)** – Course, student, and result management
- **AI Chatbot** – Simple chatbot using basic NLP techniques
- **Daraz.pk Clone** – E-commerce frontend using HTML, CSS & JavaScript
- **Hostel Management System** – Room allocation and student tracking
- **Library Management System** – Book issue/return system with search feature
